

HYLA PUNCTATA (Rana Punteada, Polkadot Treefrog): VENEZUELA: ESTADO BARINAS: Barinitas, 600 m. 16 June 1990. A. J. Cardoso and J. Péfaur. Colección de Vertebrados, Facultad de Ciencias Universidad de los Andes, Mérida (CVULA 5280). Reserva de Fauna, Sabanas de Anaro. 28 October 1994. R. Rivero. Museo de la Estación Biológica Rancho Grande, MARNR, Maracay (EBRG 2850, 2856). Both verified by Andrés Orellana. ESTADO BOLIVAR: Reserva Forestal Imataca, 40 km ENE Tumeremo. 11 September 1990. A. Mijares and J. Ochoa. EBRG 267. Verified by Oswaldo Fuentes. First state records for Barinas. Species was previously known from three localities in Venezuela, two from the delta of the state of Amacuro (Orinoco delta) and another from the state of Bolívar (Hoogmoed 1979, Zool. Verh. 172:1–46; Barrio 1998, Acta Biol. Venezuela 18[2]:1–93). These records corroborate presence of species in lowlands, up to 600 m in Venezuela, including the Llanos and the foothills of the Andes, some 1000 km W of the former referred localities. To date, the species is known in four bioregions (sensu Barrio, *op. cit.*), the Andean, Delta, Llanos and Guayanán.
