

PODOCNEMIS UNIFILIS (Terecay). **MAXIMUM SIZE.** The maximum straight-line carapace length (CL) of *Podocnemis unifilis* reported by Pritchard and Trebbau (1984. Turtles of Venezuela. SSAR Contributions to Herpetology, No 2. 403 pp.) is 47.5 cm. I report here two turtles from Hato La Trinidad, Rio Guanare Viejo, Departamento Arismendi, estado Barinas, Venezuela, collected by S. Boher, 26 February 1992, with CL measurements of 500 mm and 496 mm. The specimens are deposited in Museo de la Estación Biológica Rancho Grande, Maracay, Venezuela (EBRG 2663--2664 respectively). Other straight-line measurements include: carapace width 353 and 352 mm; shell height of 180 and 180 mm. To my knowledge, these are the two largest *P.unifilis* ever reported in the literature.
