

CHIASMOCLEIS HUDSONI (NCN). VENEZUELA: ESTADO AMAZONAS: non-flooded rainforest near the confluence of the Pamoni River with the Casiquiare River, 2°50'N, 65°43'W, ca. 80 m elev., inside a soil profile pit in early morning hours after a rainy night. W. Schargel. 30 February 2000. Museo de Historia Natural La Salle, Caracas, Venezuela (MHNLS 16112). Verified by C. Señaris. Second state record, and first voucher specimen in a Venezuelan museum. The species is distributed through the Guianas (Surinam, French Guiana, Guyana; Lescure and Marty 2000. Atlas des Amphibiens de Guyane. Museum National d'Histoire Naturelle, Paris) and Venezuela. *Chiasmocleis hudsoni* was reported (without voucher number) from Venezuela from the base of Serranía de la Neblina, a few km from the border with Brazil, and ca. 110 km from Colombia's border (Zweifel 1986. Amer. Mus. Novitates 2847:1–24). This species has not been reported from either of these countries. The Neblina locality is 200 km S of the Casiquiare record.
