

COLOSTETHUS HUMILIS (Sapito Niñera Humilde)
VENEZUELA: ESTADO TÁCHIRA: Doradas, Uribante river
(precise locality not stated), 1500 m. 18 June 1985. Proyecto
Uribante-Caparo. Colección de Vertebrados, Universidad de los
Andes (CVULA 3790). Verified by A. Orellana. First state record
southernmost and westernmost for the species, ca. 215 km from
the type locality, at Boconó, Trujillo state (Rivero 1978. Mem.
Soc. Cien. Nat. La Salle, 38 [109]:95–111). The new record is in
the same Andean piedmont considered to be an Amazonian corridor
(Barrio-Amorós 1998. Acta Biol. Venez. 18[2]:1–93).
